

Federal Building at

125 E 100 No. Heber

Utah, houses Heber

Post Office from

1967 to date on

ground floor

POST OFFICE BUILDING— A delay has been experienced in the construction of Heber City's new post office and federal building. The architect's drawing above has undergone some change and bids are expected to be let sometime in October of this year.

Post Office Construction Delayed Until October

Sen. Frank E. Moss, D-Utah, said last week that a new construction schedule has been compiled for the Heber City Post Office and Federal Building.

Sen. Moss said General Services Administration officials hope to have the design for the building completed by August 20.

Bids will probably be advertised on or about September 10, with bid opening scheduled for about October 8.

A construction contract will be awarded a few weeks after that, with all construction to be completed by September, 1966.

"It is regrettable that delays have come about to prevent a con-

struction start this year," Sen. Moss said.

The new schedule was given to Postmaster Heber M. Rasband of Heber City in a letter written last week.
